# tirefill

The Ultimate puncture protection

# Rely<sup>®</sup>

Flat Proofing Polymer

[carpenter.com](http://carpenter.com)

☀ Rely® TireFill is designed to offer cost savings and safety features to any pneumatic tire

☀ Rely® will ensure that the full working life of the tire is achieved by enabling it to run to its maximum specification, which cannot be changed by ambient temperature or punctures as pressures are maintained

☀ TireFill is supplied as a liquid. It is a 2-part chemical which is mixed at a 50:50 ratio to cause the reaction that will cure the product inside the tire

### Two types of Rely® TireFill

- ☀ Rely® T-32
- ☀ Rely® T-25
- ☀ Rely® T-25 OEM

### Applications TireFill can be used for:

Heavy Construction Equipment  
Underground Mining Equipment  
Large Front-end Loaders
