

Qualux[®] Family

The most trusted name in furniture cushion since 1970

Qualux[®] meets your demands for comfort, support, resilience, and consistency. The material has a soft surface, yet firms up quickly when compressed, providing proper body support in all seating applications. From office seating to luxurious home furnishing, Qualux[®] high resilience foams help make products more comfortable, durable, and marketable.

The high support factor and high resilience of Qualux[®] results in a better "ride" in the cushion.

When tested against other foams using a constant force pounding test, Qualux[®] performs much better than other high-resiliency and conventional products. This results in fewer returns and customer complaints.

Qualux[®] and Qualux[®] Ultra foams meet the environmental criteria for CertiPUR-US[®].

All Qualux[®] and Qualux[®] Ultra materials pass the current California 117 flammability standards.
