

# Foam Solutions for Healthcare

At Carpenter, we're committed to making the world healthier, safer, and more comfortable. We seek to provide the most innovative products and solutions with a focus on enhancing the quality of people's lives.

Our foams are used to create customized solutions for the medical industry. As the world's largest vertically integrated manufacturer of polyurethane foams, we offer an extensive range of colors, sizes, densities, and firmness levels to meet your specific requirements.

## Our foams are used to design:

Hospital  
Mattresses

Wheelchair  
Cushions

Positioning  
Systems

Operating Room  
Table Pads

For more information on how our foams can support your medical solutions, please contact your Carpenter account manager.
